

## Group of individuals

I would like to submit the following comments regarding proposed amendments to WAC 173-98, Uses and Limitations of the Water Pollution Control Revolving Fund, under CR 102 17-09-078.

These comments relate to the eligibility criteria for using Clean Water State Revolving Fund loans for land acquisition. The proposed changes to WAC 173-98-100 (20) includes additions for siting of water pollution control facilities (b), for riparian area protection (d), and for drinking water source protection (e).

I support these additions. However, one category needs to be added: watershed protection. Management at the watershed scale is important to protect water quality. Right now, standard industrial forest rotations produce watersheds with young forests. Younger trees use more water than older forests thereby making less water available during critical times for salmon. Stream flow deficits in late summer and early fall contribute to other water quality impairments such as low dissolved oxygen and high temperatures. They are also an issue for drinking water availability.

Allowing CWSRF loans for land acquisitions at the watershed scale is crucial for being able to secure better forest management that improves drinking water, protects aquatic wildlife, and preserves water for recreational use.

Please further amend WAC 173-98-100 (20) to include watershed-scale protection as an eligible category for land acquisition.

Thank you,

986 Signatories
