I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Robert Gilman

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern:

What is just is just. What must be done must be done. What is just must be done. What is just and undone shall take its toll from those responsible, through action, or through inaction. So it is. So it was. So it always will be. May it be that you have the wisdom to do what is just.

Regards.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Maureen Silveira

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Joy Leet

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

I want to move to Seattle soon and fell immediately in love with the Pacific Northwest, of which one of many jewels is the Columbia River, so I am very invested in keeping it flowing clean and clear so I can regularly enjoy it one day!

Thank you,

Candice Martin

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Fred Peirce

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

121 Windshire Drive
South Windsor, CT 06074

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Katherine Osterloh

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Jo Ann McGreevy

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Eve Rose Whiting

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern:

Please do not make our rivers into open sewers into which all manner of pollutants are dumped. We are seriously imperiled by global warming. According to a "Fast Company" report on a UN report on climate change, here's what will happen if we don't act now:

"If you choose to do nothing, you can watch as the world continues on its path to an apocalyptic nightmare by 2100, when we'll face mass extinctions, a dramatic increase in wildfires, dead fish, and limited fresh water to drink.

"Even by 2030, crop yields will drop in many places, including North America. By 2040, more species will face extinction, and both flooding and drought will increase. Wine production in Europe will decrease in the 2050s. Malnutrition and disease will increase in places like Africa. Most coral reefs will disappear.

"By 2060, more New Yorkers will be dying in extreme coastal storms. Invasive species will spread in Europe, while lack of snow starts to affect the Alps. Coastal communities in New Zealand and Australia will begin to flood from rising seas by the 2080s. By 2090, average temperatures in Africa could be as much as six degrees hotter."

Is this the kind of world you want your children, your grandchildren, and great grandchildren to live in? It's coming, and it's bearing down on us a lot faster than we'd like to admit. But like opioid junkies, we can't seem to give up our addiction to fossil fuels.

That's why I strongly urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification. Listen to the people who would be adversely affected, not to the greedy, grasping, couldn't-care-less corporations.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized (and seriously stupid) ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Why when the entire world has accepted the need to address climate change, with the exception of the Trump government, are we encouraging greater destruction of the ecology? In what world, other than the greedy corporate world, does this make sense? Please reconsider this whole matter and take the side of the whole world in addressing climate change and the nightmare it will inflict upon our children and grandchildren. Thank you.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

scottsdale, AZ 85252

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Mary Garcin
