I live just below this site, at 2411 28th Ave NW, 98502. I am concerned about building homes in the area. Within a time period, my dog, my neighbor's dog, and their neighbor's dog died from cancer. What are the odds?

Also, probably not relevant; however, there is a family of coyotes that live up there. I believe they shouldn't be displaced.

Thank you.
