Cincinnati, OH 45209

5132881306

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Josie Silva

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Dan Vasile

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Columbia Heights, MN 55421

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

China has moved away from coal, having suffered the consequences of devastating pollution, why on Earth would the US want to fight its way to the top of that slag heap? It doesn't make sense, economically, and certainly not environmentally.

To whom it may concern,

Please do not grant Millennium a 401 certificate. Giving permission to contaminate is a statement of priorities - that corporate quarterly profits take prescience over the well being of citizens and our country. Short sightedness now will yield disaster in the near future. Your choice should be obvious.

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

James Tillotson

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

With apologies to Woody Guthrie:

This land was your land This land was my land
From California to the New York island;
From the red wood forest to the Gulf Stream waters
This land was ruined for you and me.

As I was walking that ribbon of highway,
I saw above me that smog filled skyway:
I saw below me that burned out valley:
This land was ruined for you and me.

I've roamed and rambled and I followed my footsteps
To the strip mined mountains of her majesty;
And all around me a voice was sounding:
This land will be taken from you and me.

When Big Oil came fracking, and I was choking,
And the wheat fields dying and the dust clouds hanging,
As the water was poisoned a voice was chanting:
This land was ruined for you and me.

As I went walking I saw a sign there
And at the top it said "No Trespassing."
And on the bottom it said some legalese ,
That sign was foisted on you and me.

In the shadow of the Capital I saw our senators,

Glad-handing one another and smiling smugly;
As they stood there happy, I stood there asking
Where is the land made for you and me?

Our congressional representatives
And our recent commanders in chief;
Have stolen our heritage just like a thief
This land was raped for Big Oil profits.

From Alaskan drilling to deforestation,
To tar sand pipelines
And fracking throughout the country
This land was ruined for you and me.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Re:
Millennium’s coal trains

The proposed project is bound to do considerable harm to the region, including the health of your residents, and anything else that requires clean water to thrive, by polluting the Columbia River and other streams and rivers.

I am told that ALL the expert testimony presented to Ecology FAVORS DENIAL. Testimony was heard from Tribes, state and federal agencies, affected communities, and the people of the Pacific Northwest. Based on this record, I urge Ecology to deny the 401 certification.

The project would reverse the region’s commitments to combat climate change... and rebranding the Pacific Northwest as "the coal export capital of the United States" would, no doubt, discourage tourism.

Please vote no!

P.O. Box 2225
Hawthorne, NV 89415

1 775 945 3853

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and surrounding watershed. The proposed Millennium coal trains are not healthy for the river, the fish and the WA economy.

Ecology has expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal.

Based on this body of evidence on record, not a lot of *the public* wants or would benefit from this dirty deal.
Please deny the 401 certification.

Thank you,

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Claudia Rousseau
13216 Clifton Road
Silver Spring, MD 20904

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Cristina Tamayo

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Robert Heydenreich

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Georgia Tattu

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Romalda Allsup

WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Teresa Campos

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

David Holloway

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Peter Keck

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

To whom it may concern,

Please deny the 401 certification to Millennium to
protect water quality in the Columbia River and countless streams and rivers that would be harmed by their coal trains. The Washington Department of Ecology has received unprecedented expert testimony from indigenous tribes; state and federal agencies; impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal.

The Washington Department of Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Anti-degradation Policy.

Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

This is the 21st century! To promote coal extraction, transportation and usage is anachronistic. We need to move forward as a country, to be on the forefront of clean renewable technologies, not promoting filthy antiquated fossil fuels because of industry money influencing legislation.

Do what's right for your state, the country and the world.

Please deny the 401 certification to Millennium

WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Coal is no longer needed. The only reason to mine it is to give the big coal owners money--which they don't need. The workers need jobs, but not ones that will kill them. Retrain the workers for today's jobs, but don't let the owners go on poisoning our atmosphere.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

To whom it may concern,

Washington State may give coal companies permission to pour coal dust into the fragile Columbia River. This would destroy the ecosystem and contribute to climate chaos. Why would Washington State choose to do that?

Washington residents strongly oppose the Millennium coal export project. What's more, the U.S. Fish and Wildlife Service thinks it's a bad idea.

The Washington Department of Ecology could choose to stop this. It could deny a key water pollution permit. I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, I urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of this region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Laurent Ross

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Washington Department of Ecology
WA

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Dell Lipscomb

Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Pam Liska

To whom it may concern,

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

Millicent Shargel

To whom it may concern,
I urge the Washington department of ecology to deny millennium permits to pour coal dust into the Columbia river. This would destroy the ecosystem in place there. In addition coal is the dirtiest fuel on the planet, and burning it has devastating effects on the environment. Thank you for considering my message

****
GOOD GRIEF:DENY THE PERMIT!
****
Down here in good 'old Texas, there aren't the regulations & provisions in place to protect our resources. There is miserable degradation statewide. The lack of protection fosters disrespect and promotes a cycle of landowner and public use abuse.

Washington DOES have documents to protect its resources. So I certainly expect you to treat Washington's resources with the honor and respect they deserve by fully protecting them.
