Christie Justice

My comments are submitted as a private citizen, eighth generation Texan, and 20+ year resident of Salado. Family members have lived in Salado for over 60 years. My three grown children and ten grandchildren have been raised visiting our village, which was settled and revolves around Salado Creek. Our creek must be saved.

I am requesting that the TCEQ start the process necessary to evaluate extending the Edwards Aquifer Protection Program to the northern extent of the Edwards Balcones Fault Zone Aquifer in Bell County.

Bell County is going to continue to grow; therefore, it is imperative that preventive protections be put in place before development reaches all sensitive areas. Do not wait until it is too late!

Many Salado groups are involved in Legislative policies in Austin. This issue is very much on our radar for the upcoming 2027 Session. Our Senator and Representative will be strongly encouraged to be sure that preventive protections are put in place.

Thank you, in advance, for doing your job to help us Save Salado Creek.
