Department of Ecology
SEA Program
Federal Project Coordinator
Post Office Box 47600
Olympia, Washington 98504

Dear Department of Ecology Director Maia Bellon,

Columbia Riverkeeper generated 817 comments on the Water Quality Certification permit for Millennium Bulk Terminals' coal export proposal in Longview, Washington. Below is the comment that applies to each commenter. Some commenters chose to write additional comments, they are listed in the preceding pages.

Thank you for allowing the public to engage in this important issue,

Jasmine Zimmer-Stucky,
Senior Organizer, Columbia Riverkeeper
Co-Director, Power Past Coal Coalition

I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses and drinking water, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Thank you,

I have been by coal driving along the north side of the Groge from train cars carrying loads of coal. Coal is archaic and no longer needed with alternative energy available. Alternative energy sources result in far more jobs than that provided by coal.

RedLion	York	redyork@gmail.com	2001 Creekwood Dr	Fort Collins	CO	80525

I don't want to see mountains of coal stored on the banks of the Columbia River. We have so much rain that will go through the coal piles and leach into the river and/or the groundwater. It will be an environmental disaster.

Fossil fuel is DONE.
Renewables NOW!

Destroy our environment to send coal to Asia. No,no no.

I am deeply concerned about the proposal's impact on the water quality near the site. After decades of work to protect salmon habitat, we should not make decisions that sacrifice the health of the Estuary for projects that undercut the state's climate goals.

Dear Washington
 Department of Ecology,
 going going gone is the
 era the call was used to
 build our infrastructure.
 this very polluting
 substance is something
 that needs to be kept
 buried from the past
 now into the present !
 we are stewards of the
 planet for without it we
 another species do not
 exist at least not to the
 duration of progeny,
 henceforth... renewable
 energy is no they come
 in and ever more viable
 option to the polluting
 call Sheila from bygone
 days. aside from all the
 fuel an old money we
 need to know to make a
 concerted effort for our
 children's children at
 least seventh generation

Wesley E.	Stoker	stoker@ecoregon.org	30110 Highway 99E	Shedd	OR	97377	into the future to

I oppose the nation's largest coal export terminal because I live in Hood River, OR near the banks of the Columbia. I have seen the toxic coal dust that ends up on the riverbank from coal transfer by rail and the effect it has on our air and water quality. This project would increase pollution 100 fold by sending 10 times more coal trains through the gorge. I believe that as the public agency with the responsibility to protect air and water quality for the State of WA, the Dept of ecology should deny the permit and oopose this project as well.

We don't want the pollution associated with coal transport, but more importantly, we should not be facilitating the use of fossil fuels.

Coal trains through are an ecological disaster even if they don't wreck. They pollute our river with tons and tons of coal dust. Coal dust causes illness in Oregon and Washington towns coal trains go through. Burning coal adds to the carbon load causing climate change that will be a disaster for children and grandchildren everywhere.

Coal production and use is a major contributor to our increasing risk of losing a healthy environment. Using precious natural resources to transport coal threatens to destroy our home. Please consider the will of the citizenry over the profit of a very few. Thank you for denying Ecology a 401 certification. Sincerely,
Susan C Walsh

Potential coal train derailments would do irreparable harm to the Columbia River ecosystem and it is just a matter of when, not if, a train derails hauling coal. We must begin to reduce our use and export of the dirtiest form of fossil fuel energy and work toward more renewable and cleaner forms of energy to save our planet from certain doom if we don't act now. Time is running out and coals time is over.

Climate change is endangering our planet - fossil fuels make climate change worse. This is a terrible idea and a money making scheme that will only hurt our communities and our environment. We need alternative energy and strong healthy communities. This is a terrible idea and if we care at all about the future of our families we will stop this proposed terminal.

I would greatly appreciate your official response to my comment at your earliest convenience, please. I urge Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest to deny Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification. Ecology must deny the 401 certification because not ecologically sage, safe or sound!

Coal burned anywhere pollutes the planet everywhere!

Please say no to his proposal. I object on a world basis, intending to raise cost of c.oal and it's particulates by limiting export and use internally. I also object to the transport and transfer of coal along the Columbia personally because I live alongside the river in Kalama. It already befouls the air and dirties the marina with my boat included. We need to say no to 98625 crazy stuff.

Mike

I have been a fisherman and waterman for most of my life. I am a licensed professional fishing guide on Washington inland and marine waters. We need to do a better job of protecting our water quality. We need to reduce our impacts, not expand them. The Puget Sound region is a fragile ecosystem, with many species listed as endangered, threatened, etc. We need to focus on restoration, conservation and preservation. Not development and exploitation. My entire livelihood depends on healthy waters and healthy, functioning aquatic biology. Please

Bob	Triggs	littlestoneflyfisher@mail.com	PO Box 261	Port Townsend	WA	98368	do not allow this coal

Because the ecological balance of the Columbia River Gorge is already stressed almost beyond repair. To create future coal export facilities makes it clear the Northwest is no longer an environmental haven.

To protect future life on Earth we must halt greenhouse gas production. This problem is very serious and urgent.

Coal is toxic to the Columbia River and the very air we all breath, it has no place near the River.

Kaitlin	Fitch	xxkate152xx@aol.com	1013 State Highway 351	Troy	NY	12180	We have so much beauty to protect here, right along with our water and our air. Coal is a dead and on it's way out. It isn't worth wrecking our area for it.
Larry and Sherry	Davis	Sherry.Scotties@gmail.com	2325 52nd Ave	Longview	WA	98632	Thank you.
Maya	Kurtz	mayachristine@ymail.com	336 Park Dr	Glenwood Springs	CO	81601	We need to stop burning coal and look to alternative, renewable energy so that we can stop climate change.

I live in the Columbia Gorge, and see the coal trains going by all the time, blowing huge clouds of dust out over the river, the adjacent main roads and the properties along the river. I have used the river for recreation, and do not want to come out of the river black or gray from coal dust. I don't want my drinking water ruined. I don't want the salmon and other fish in the Columbia and at the mouth of the Columbia to face even more deadly water quality. I spent a good bit of time in Ireland where coal is used heavily as fuel. It pollutes the air, hurts the lungs, and makes the surrounding buildings, cars, fields dirty. Having

I am a systems ecologist,
teacher, and I vote.

There is no long term
benefit to coal export.

Public lands are often
destroyed at sub-market
rates to extract coal.

Private land along rail
lines are dusted with
coal at the rate of one
pound per car per mile.

Even allowing for
industry claims of 1/10
that amount after
mitigation that would
amount to hundreds of
pounds of dust every 50
feet each year. It's
simple math.

Comparable dusting
occurs at load and
unload sites. Despite
industry claims of dust
management the
volume of coal handled
means even a tiny per

Fossil fuels are killing us and the planet.

Let's rebuke the polluting profiteers once and for all. We taxpayers are not only horrified by enabling the accelerating climate change with any local fossil fuel export facilities, we are also justifiably tired of the expense and harriving of public officials involved in handling these fast-buck proposals from corporate greedheads. A healthy world for our descendants cannot be bought; it must be nurtured.

I live near a coal export terminal in Richmond CA, actually, I live downwind of the pile. So does my whole community. We already have health issues from the Chevron Refinery in our neighborhood, so all the health effects of coal added to the fossil fuel problems, add up and exacerbate the disease issues families have struggled with for decades. 20% of coal is blown out of the rail cars during transit, because there are no covers on the tops. So much coal dust is now deposited in my yard, I fear to eat anything grown there. I now have lung issues and did not have any before.

Green, clean, renewable and environmentally friendly energy, is the way. Future generations, are depending on our choices today.

Arlin Crane arlin.crane@gmail.com 306 Desert Canyon Blvd Orondo WA 98843
Fossil fuels are so last century. Let's go forward into the future for ourselves and our children. Develop green energy for all of us.

Coal is an outdated fuel source that pollutes our planet whether burned in the U.S. or in Asia, or elsewhere. Pacific Northwest governmental agencies have a duty to protect our natural environment of clean rivers, clean air and to maintain our Columbia River for recreation and Tribal fishing. Endangering this valuable treasure with trains loaded with coal & the coal dust during transport will be a short-lived economic gamble. A major coal terminal is not a bargain for our Northwest values. Thank you for your consideration. Anne-

Don Jacobson donjphoto@gmail.com
MOVED - 941 SE 55th Ave. Portland OR 97215

This whole project was doomed from day 1. Asian countries are shuttering coal plants as quickly as they can, and the sweet spot for exporting coal ended in 2014. Wind and solar continues to get cheaper, so this whole project is already a stranded asset. So there is no conceivable societal value in approving a project that would continue to pollute the Columbia River, as recently proved in the BNSF lawsuit over coal dust entering the Columbia.

Washington State cannot legitimately say that it supports the Paris Accord to slow down climate change, then turn around and allow coal trains on our rails. Either we are a green state or we aren't and I think we can do a lot better than just talk about how sustainable and green we are. Let's actually do what we say we are going to do and stop allowing coal trains in Washington State.

Deborah Hill dhill@pugetsound.edu 1602 N Cheyenne St Tacoma WA 98406

We need to protect the river and surrounding communities and we need to move toward CLEAN energy not dirty coal.

Cindi Lund CindiLund@sbcglobal.net 206 Estates Drive Danville CA 94526
David Regan dregan02@msn.com 623 SW Park Ave Portland OR 97205

I live at the rim of the Columbia River Gorge. I am already experiencing the results of climate change. I live on a forested lot and have mature Douglas Fir trees and other native flora dying due to prolonged summer drought and unusually cold and wet winters. I hike regularly in the Gorge along as do millions of other people. Increased industrial activities such as diesel train locomotive exhaust and coal dust would aggravate already bad air quality, reduce scenic values and increase incidence of asthma and other pollution related disease.

A Michael Dianich mdianich@gmail.com 42740 E Larch Mountain Rd Corbett OR

97019

There is no reason to use this 19th century fuel when we have cleaner, renewable technology for our energy needs.

Maureen	Knutsen	maureen.knutsen@gmail.com	PO Box 134	Naknek	AK	99633

As the sone of a coal miner and having growing up in coal mining communities I can attest to the pollution that occurs with coal. Also as a kid we "hooked a ride" on coal trains in the yards. Once we rode that train on out on the main line. The particles of dust coming off of those loaded cars was a constant stinging in our faces. Coal is dirty. And when it is burned the results are more dirt. Do not approve anything to do with the proposed Millennium coal project.

I oppose coal export because it is too polluting to burn in this country and anywhere else. It causes more greenhouse gas emissions than other fuels wherever else it is burned. Corporate profits are not a good reason to flood lowlying population centers such as Florida or poorer nations near sea level. Why make our children pay the price for corporate greed and profits that only benefit wealthy kleptocrats. If you are truly public servants you will look out for the common good instead, and do what is obviously right here as a public agency charged with

Let's find solutions that
are not toxic they are
out there

because of the pollution
it would create

I oppose any new infrastructure that continues our dependence on energy produced by climate and environment destroying technologies! The only people this will benefit are the big money profiteers who don't care about any of us at all! We need to rise up and say NO, STOP! We need to work together to advance and improve on healthier ways of producing energy and ways of consuming less energy! Deny the 401 certification! Thank you! climate change. there is

Coal waste must not be dumped into waterways, streams or the Ocean. Clean air, water and soil are essential to life.

We as a state, country and world, need to move away from fossil fuels. Exporting coal and polluting the air and water us not the answer. Please reject thia application!

Because we can't stop using fossil fuel any sooner than NOW!

Stop the insanity! We do not need these polluting global warming archaic projects. Coal is dead, it is never coming back, move on to planet saving projects like solar and wind. Focus on saving the planet. Be on the right side of history and stop this insanity!!

Is the future of the planet based on Coal power? We all know that is not the case. Its time for our country to step up and do our part to clean up the world. This coal terminal sounds like a disaster waiting to happen. Our family says "NO!" to coal. Chris Slaton

							My family and I support clean water and energy alternatives over fossil fuel mining, export and use which benefit only corporate interests. The world MUST shift to better local energy sources and less consumptive lifestyles.

Joel	Rosenblit	rosenblitj@msn.com	2208 Joplin Ct. South	Salem	OR	97302	We need to move from coal to renewables.

I don't believe coal is sustainable to use. We need to wean ourselves off of it. I don't want these trains going through my community and polluting the air and water.

This project is environmentally degrading from the minute coal is extracted to the long after it's burned. We know that mercury is entering our water from air-born emissions. The transport of coal along the Columbia exposes our waters to continuous gradual deterioration. It is not the kind of industrial development that is worth the costs to Washington State or the global community. Please deny this project the 401 certification.

The production and transport of coal pollutes and damages the environment in ways that cannot be mitigated. The behavior of the coal industry and business pollutes and damages our democracy.
