

## A permit to pollute the Columbia River? No thanks!

Dear Department of Ecology Director Maia Bellon:

I urge the Department of Ecology to deny Millennium's Clean Water Action Section 401 water quality certification. Millennium has failed to demonstrate that it can prevent coal and coal dust from entering the Columbia River, both at the project site and en route to the terminal. The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Additionally, I oppose the coal export terminal because

*the toxics in coal are harmful to aquatic life and humans.*

Additionally, I oppose the coal export terminal because

I am a retired RN who has cared for numerous heart and lung patients. It is a known medical fact that coal dust is a cancer causing agent and also several effects asthma and lung disease. Keep our citizens safe - say no to this project.

Additionally, I oppose the coal export terminal because

NO WASTE WATER SHOULD BE

ALLOWED TO BE DISCHARGED INTO

THE RIVER, UNLESS MILLENNIUM TERMINALS

DEMONSTRATES HOW WASTE WATER / RUN OFF

WILL BE CONTAINED + TREATED, THE PERMIT

SHOULD BE DENIED.

Additionally, I oppose the coal export terminal because

Our ecosystem is more fragile than we know we must protect it and value our health and our future over profit. ~~Millennium's~~  
And besides, the profit in coal won't last much longer. Invest in clean energy now, while we still have time
