

A permit to pollute the Columbia River? No thanks!

Dear Department of Ecology Director Maia Bellon:

I urge the Department of Ecology to deny Millennium's Clean Water Action Section 401 water quality certification. Millennium has failed to demonstrate that it can prevent coal and coal dust from entering the Columbia River, both at the project site and en route to the terminal. The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Additionally, I oppose the coal export terminal because

Coal has no future. If low-carbon technologies
 on the coal, it will have no future either.
 Just like lumber mills, just like aluminum, coal
 will eventually leave town.

Millennium's oversized ambitions to rebrand the Pacific Northwest the coal export capital of the United States conflict with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Additionally, I oppose the coal export terminal because

COAL & COAL DUST IS TOXIC AND WILL IMPACT
THE ENTIRE ROUTE THAT THE COAL TRAVELS
TAKE IN ADDITION TO THE TERMINAL SITE ITSELF.
PLEASE DO NOT GRANT THIS PERMIT.
