

Debra Mumm Felnagle

I am not in support of the Coal Export Terminal because I believe the use of fossil fuels as an energy source is destructive to our Planet. I live right next to a railroad track that transports coal in open railroad cars. Every three months, I have to clean out the black coal dust in my heat pump filter that is expelled into the air from the coal cars. I cannot imagine what my family and I are breathing with even just this limited exposure to coal. Please add my voice to vote to reject the building of this terminal.
