

Liza Michaelson

I have been a property owner and business owner on San Juan island for 34 years. Tourism is our main industry. People come to San Juan island predominately to see the Orcas.

The Southern Resident Killer Whales are an endangered special. they live here in the summers and feed on Chinook Salmon in the Columbia river. in the winters. The Columbia River and Salmon River Chinook Salmon are also listed as endangered.

I am concerned about the potential impacts from the proposed Millennium Bulk Terminals coal export project on the health of the endangered orca whales and the endangered salmon.

Once these species are gone we will not get them back. The time is now.

I am asking that you please deny Section 401 Water Quality Certification for this project.

On behalf of future generations,
Thank you.
