

Diane Pasta

Millennium Bulk Terminals wants to spoil the health and habitat of our citizens by building North America's largest coal export terminal right on the Columbia River.

As a Quaker (member of the Religious Society of Friends)I oppose this action, and am asking the Department of Ecology to deny any permits that would allow this to happen. Specifically, deny any water permit. We need to protect these public resources--air and water and others--from pollution and other degradation.

Please look forward to the well being of the children and adults who would be impacted by such actions.

Thank you for protecting the environment and all of use who depend on it.
