

Anna Pedroso

The Columbia River is a beautiful gift to humanity. It has suffered enough abuse at human hands. I don't want the coal terminal built on the river and I would like the water permit to be denied. I think this is risky to the river, the environment, and all living beings that end up breathing the air around it. I also believe that we shouldn't continue supporting a fossil fuel industry that is on its way out.

Please deny this permit.
