

Randall (Randy) Henderson

As a husband, father, grandfather, former Southwest Washington Area Wide Agency on Aging planning director and United Methodist pastor, I lived and worked along the Columbia River over many years. It and the great watershed that feeds it are incredible gifts of God for which we have been given responsibility. Using this beautiful and essential natural resource to transport such a dangerous commodity staggers my mind, heart and soul. I hope and pray that it staggers yours as well. Please, don't allow a coal terminal to be built at Longview or anywhere else in the Columbia River watershed for any reason. Thank you. Rev. Randy Henderson
