

M. A. Fritchie

It is time to stop the shipment of coal through our state. We need to save our planet--sending coal through our state is harmful to our environment. It is the twenty-first century and our knowledge of coal pollution has taught us there are new and better ways to provide energy. Also, the possibility of a train derailing and causing a huge pollution issue to our rivers and streams would be a catastrophe. Stop this madness, We need people with scruples governing and not corporations pushing for the almighty dollar. No Millennium Bulk Terminal in Longview, WA.
