

Oregon Physicians for Social Responsibility

108 members of Oregon Physicians for Social Responsibility urge the Washington State Department of Ecology to deny the Section 401 Water Quality Certification for the Millennium Bulk Terminals Longview Coal Export Terminal located at 4029 Industrial Way in Longview, Washington. See attached document for more specific details and the full list of our 108 members who have declared their opposition to this permit to pollute the Columbia River.

Thursday, July 27th, 2017

We, the undersigned, urge the Washington Department of Ecology to protect water quality in the Columbia River and countless streams and rivers that would be harmed by Millennium's coal trains and vessels. Ecology has received unprecedented expert testimony from Tribes, state and federal agencies, impacted communities, and the people of the Pacific Northwest requesting denial of dangerous Millennium's proposal. Based on this record, we urge Ecology to deny the 401 certification.

Ecology must deny the 401 certification because Millennium's project would violate Washington State's water quality standards, harm designated uses and drinking water, and contravene the state's Antidegradation Policy.

The project also flies in the face of our region's commitment to combat the devastating impacts of climate change. Millennium's oversized ambitions to define our Pacific Northwest as the coal export capital of the United States conflicts with the public interest in thriving local economies, clean water, clean energy, and healthy communities.

Please deny this permit.

Thank you,
