Worried about the condition of the zetterberg subdivision 2806 marietta,it's partially on a geo hazardous zone and below is a 100 year flood zone.it looks terrible the retention pond is always full (and so close to the public road there is not a fence keeping children or anything from falling in to the quegmire we live above it and I have been told it's a water recharge under ground-its always a pond this time if year in my neighbor s yard on the hill and it really looks like alot of erosion is happening!we are all concerned
