

City of Port Orchard

This comment is in response to Section f) Long-Term Municipal Stormwater Planning. Please be advised that the City of Port Orchard does not support this strategy/ future permit compliance requirement, as it is both unfeasible and burdensome on the City and it's Citizens. It is completely unreasonable to think that a small city like Port Orchard would have the means to bring existing public and private storm water quantity/quality mitigation facilities into compliance with current and/or future standards.
