

## Paula Rotondi

Enough. We can not allow any additional, new, or increased poisoning of our planet upon which all life including human life depends. Please reject the permit to allow the use of imidacloprid in Willapa Bay and Grays Harbor. We can no longer pursue policies permitting the killing of anything and everything that harms corporate profit at the expense of harming the environment upon which all life and including human health depends.

Earth's already had far too much human poisoning; we can not afford to spray thousands of acres of coastline with imidacloprid, a dangerous neonicotinoid pesticide, which can devastate aquatic invertebrates and the animals that rely on them for food as well as the oysters and clams we eat.
