

## A.L. Steiner

My family & I FULLY OPPOSE the toxic spraying of Willapa Bay and Grays Harbor with any quantity of imidacloprid. Although the "no action" alternative is acceptable, the only really effective and protective alternative is restoration of the bays' ecology. The spraying of such ruinous and deadly toxins are decimating and destroying insect, bird and wildlife populations worldwide, as well as the complex ecosystems in which they're desperately trying to survive. We need these ecosystems left INTACT for continuing human survival.
