Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

S Thompson

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

John Wilson

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

heather wilber

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

David Saveikis

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Cheryl Lewis

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Robert L. Hamilton, Jr.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard, and, diligent, work to evaluate the criteria to designate Puget Sound as a No Discharge Zone! Based on your study, OUR FAMILY BELIEVES THAT PUGET SOUND IS POISED TO JOIN OTHER ICONIC WATERWAYS ACROSS THE UNITED STATES AS A NO DISCHARGE ZONE!

WE ARE IMPLORING THE DEPT. OF ENERGY TO STOP SHIPS FROM DUMPING SEWAGE INTO PUGET SOUND!

WASHINGTON'S PUGET SOUND IS A NATIONAL TREASURE! Few aquatic environments in the U.S. can compare to its natural beauty and marine resources!

THE SOUND SUPPORTS THOUSANDS OF ANIMAL AND PLANT SPECIES, FROM ORCAS TO EELGRASS! And, local fishermen depend on it for their livelihoods!

But, THE SOUND AND ITS TRIBUTARIES, ARE IN TROUBLE! HUGE SHIPS ARE ENDANGERING ITS WILDLIFE BY DUMPING RAW OR PARTIALLY UNTREATED SEWAGE!

MY FAMILY AND I ARE TELLING THE DEPARTMENT OF ECOLOGY: STOP SHIPS FROM DUMPING UNTREATED SEWAGE INTO OUR FRAGILE MARINE ECOSYSTEMS!

WHEN SHIPS DUMP UNTREATED , OR, EVEN PARTIALLY TREATED SEWAGE INTO PUGET SOUND, THE BACTERIA, VIRUSES , AND, OTHER PATHOGENS CAN HARM THE FRAGILE ECOSYSTEM! THE IMPACTS ON WILDLIFE--FROM SALMON TO ENDANGERED ORCAS--CAN BE HUGE! And, it can even get into our food and make us sick!

THE STATE OF WASHINGTON IS POISED TO STOP SHIPPING COMPANIES FROM DUMPING RAW SEWAGE INTO THE SOUND! This would make a big impact for all the people and wildlife who call Puget Sound home!

IT WILL ALSO SEND A MESSAGE TO TRUMP'S EPA THAT STATES WILL NOT ALLOW INDUSTRY TO POLLUTE OUR WATERWAYS! While several places in the U.S. have discharge bans, Puget Sound would be one of the biggest, and, would set a precedent for regions like the Gulf, Alaska, and, the Southeast, that do not have these protections!

But, the shipping industry is doing everything it can to fight back! WE NEED TO MAKE SURE THAT THE DEPARTMENT OF ECOLOGY DOES NOT CAVE IN TO THESE BIG POLLUTERS!

TO DATE, THE PACIFIC NORTHWEST IS THE ONLY REGION IN THE NATION THAT HAS NOT DESIGNATED NO DISCHARGE ZONES FOR ANY WATERS! Puget Sound, a national treasure, NEEDS THIS TYPE OF PROTECTION! OUR FAMILY FULLY SUPPORTS DEPARTMENT OF ECOLOGY'S DETERMINATION TO ESTABLISH THE PUGET SOUND AS A NO DISCHARGE ZONE!

This simple and common sense approach will protect public health, keep our waters clean, PROTECT SENSITIVE MARINE LIFE, and, important shellfish harvesting areas!

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then, pump it out using any one of the 100 designated pump-out facilities that are available throughout the Puget Sound!

We support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound! Puget Sound, and, its tributaries, are threatened by many sources of pollution, and, while no one source is solely responsible for the Sound's water quality problems, all of the sources add up! IT IS TIME TO ADDRESS SHIP POLLUTION IN ORDER TO HELP PUGET SOUND RECOVER THE HEALTH OF ITS ECOSYSTEM!

Again, thank you for your hard work and, WE STRONGLY SUPPORT THE ESTABLISHMENT OF A PUGET SOUND NO DISCHARGE ZONE!

Sincerely

DIANE KASTEL

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Nora Polk

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Lindabeth Schmucker

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Steve Messina

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Janet Saupp

I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Anne Geloran

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

There comes a point where garbage cannot be absorbed into oceans without destroying marine life; let us not get to that level but be proactive and smart!

Sincerely

Mara Beldavs

Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Paul Mittelbach

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Sonya Exton

I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jacqueline Berliner

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Christine Tampellini

I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jessica Stewart

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

R Devoria

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Michael Martin

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Kevin Fay

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Dennis Allen

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Ronald Marks

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jeff Garner

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Stephanie Sell

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Nadine Roch

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Nancy Hayden

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Gary Bellert

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jamie S.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Nicole Burnett

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Scott Carroll

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Janie Heim

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Matthew Hinton

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jan Jennings

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

WHY THE HELL DO YOU WANT WASTE DUMPED IN OUR BACK YARD??? YOU ARE ALL TOTAL JERKS!

Sincerely

Lynn Morris

I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Yalile Chavez

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Larry Rosenkranz

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Linda Barnett

Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Janet Rohde

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Rachael Cantrell

Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Brandon Barrett

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Kelly Hyson

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

(Ms.) Toby Grandberg

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Ulrich Schulze-Rosbach

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Heather Wolfe

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Morton Silverfine

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Diana Light

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Nancy Diessner

I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Charla McMillian

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Magaly Horan

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is, thankfully, poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, UNFORTUNATELY, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and intelligent proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important, environmentally and economically crucial, shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support swiftly establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is far past time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Mary Sigler

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jared Miller

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

PLEASE use the onshore tanks and DO NOT dump in the Sound.

Sincerely,

Betsy Edholm

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Gail Frethem

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Jessie Skumatz

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.

I support establishing a No Discharge Zone because of the critical protection it will provide to the people, marine creatures, and water quality of Puget Sound. Puget Sound and its tributaries are threatened by many sources of pollution and while no one source is solely responsible for the Sound's water quality problems, all of the sources add up. It is time to address ship pollution in order to help Puget Sound recover the health of its ecosystem.

Again, thank you for your hard work and I strongly support the establishment of a Puget Sound No Discharge Zone.

Sincerely

Matt King

Puget Sound NDZ

Dear Ms. Jankowiak:

Thank you for your hard and diligent work to evaluate the criteria to designate Puget Sound as a No Discharge Zone. Based on your study, I believe that Puget Sound is poised to join other iconic waterways across the United States as a No Discharge Zone.

To date, the Pacific Northwest is the only region in the nation that has not designated No Discharge Zones for any waters. Puget Sound, a national treasure, needs this type of protection. I fully support Department of Ecology's determination and proposal to establish the Puget Sound No Discharge Zone.

This simple and common sense approach will protect public health, keep our waters clean, protect sensitive marine waters, and important shellfish harvesting areas.

Fortunately, over 97% of boaters already do the right thing -- they have holding tanks onboard to store sewage (also called blackwater), then pump it out using any one of the 100 designated pumpout facilities that are available throughout the Puget Sound.
