| Draft 2019 SWMMWW Section<br>(select from drop down) | Comment  | Comment Made By    |
| IV-1 Source Control BMPs Applicable to All Sites     | WWA Phase II Permit Section S5.C.5.f/S5.C.7.e has a list of practices, policies and procedures that Permittees are required to implement. Pipe cleaning, cleaning of culverts that convey stormwater in ditch systems, road repair and resurfacing, including pavement grinding, and pavement striping maintenance are the only ones that do not have Source Control BMPs listed in Volume IV. Please add source control BMPs for those items. | City of Marysville |
| S440 BMPs for Pet Waste                              | Please remove the recommendation to bury pet waste. The number of pets found in Western Washington is too high to make burying waste and effective BMP. Some bacteria and other organism have been found to persist in soil. The CDC cites contact with contaminated soil as a cause for some infections in humans.  | City of Marysville |
