Please share any concerns or opinions about the Guidance revision - What would you like to see changed or added? To provide more detailed answers, please use this excel [spreadsheet](#).

I hope the guidance will address areas of overlap with reclaimed water use permitting, aquifer recharge permitting, underground injection control facility management, relative strength of different CARA mapping methods. I hope the various appendices are updated; very helpful to have up-to-date reference lists for applied research and example management tools - potentially from other states when appropriate. Thank you!
