Preserving our precious water resources is enormously important! We can't just keep drawing more and more water from our rivers, streams, and underground! We have to set limits!

- 1) Prioritize water conservation for rural homes and businesses as the key offset project.
- 2) Keep the 500 gallon per day limit.
- 3) Keep the outdoor watering limit.
- 4) Employ a cost-benefit analysis, funding availability and certainty of success criteria to rule out poorly conceived mitigation projects.

5) AND ESTABLISH A METERING SYSTEM! HOW CAN WE TELL WHETHER OR NOT PEOPLE ARE FOLLOWING THE RULES UNLESS WE METER? IT MAKES NO SENSE!

Thank you! Myra Ramos
