

## Pam Borso

I am writing to comment on the WRIA 1 draft rule amendment.

Please retain the 500 gal per day use limit for family water consumption and require metering to monitor. How can we ever know how much water is available if we don't measure it.

Please make Domestic Water Use Efficiency (Conservation) programs and projects the primary source of mitigation. Conservation is always overlooked and is often the most efficient way to mitigate.

Please use cost benefits analysis, funding availability and certainty of success criteria to rule out poorly conceived mitigation projects and those that actually do nothing but shift resources around.

Thank You

.
