

Ashley S

I wholly disagree with these proposed rule changes. Rural, private Wells are NOT a problem in whatcom county! There is ample water to retain the suggested 3,000 gal per day (and likely the 5,000 gal per day should remain in law) because whatcom county FAMILIES, FARMS and BUSINESSES are not using too much water. There is NO science to back this proposed rule change and thus the DOE needs to STOP creating law that will DESTROY this county.
