

Elizabeth Pernotto

1. I support retaining the 500 gallon per day use limit for family water consumption and I support requiring metering to monitor this. People are much more conscious of their use if they must pay. Without metering, it is impossible to know if conservation efforts are effective.
2. I support making domestic water use efficiency programs and projects the primary source of mitigation.
3. I support using a cost/benefits analysis, funding availability and certainty of success criteria to rule out poorly conceived mitigation projects and those that rob Peter to pay Paul.
