

## Judy Criscuola

I do not agree with the proposed new rules! For years our well has provided plenty of water even in the dries summer so I see no reason to cut the limit of 500 gals. per day from 5,000 gals. We do NOT have a water problem! We are one of the wettest county in the state. Please the current rules the same. Besides the Dept of Ecology does not have the authority to make new rules. The legislature makes laws.
