

## Lindsay Taylor

Adequate instream flows are critical to maintaining a healthy Nooksack River watershed and healthy wild salmon runs. Please help protect this invaluable resource by retaining the 500 gal per day use limit for family water consumption and require metering to monitor water usage, making Domestic Water Use Efficiency (Conservation) programs and projects the primary source of mitigation, and using cost benefits analysis, funding availability and certainty of success criteria to rule out poorly conceived mitigation projects. Thank you for working to protect WRIA 1's water resources for the people, fish, and wildlife that depend on it.
