I am completely opposed to WRIA Rule Amendment 1. You have no right to what I choose to do with my property nor do you have the right to diminish my property value with your unnecessary and burdensome regulations. There is little scientific evidence that's been presented to substantiate the claim that a well capable of supporting 5,000 gallons of water usage per day is impacting anything in my area. I have read that the impact on streams and lakes from wells this size account for less than 1% loss in stream or lake content.

You people are completely out of control in Olympia. You will be stopped. Lawsuits are coming and I will be right there with the class to fight this idiocy.
