

Michael Luzzo

As the Yakima River enters the Columbia River within the Tri City area its sediment load has been silting just past a causeway. By use of PUD # 1 Jefferson County vs Washington Dept of Ecology can this be done? 2 culvert passages be set into a Bateman Island Causeway for current passage? With Use of the White Doctrine can it be determined if canal water used as far as Findley Washington is fairly used? There is a point of contention between the Benton County Water Board and water using residents. Will taking down Horn Rapids Dam affect this?
