

## Susan Amstadter

I support the Urgent Alert issued by the Spokane Riverkeeper organization because the risks associated with proposed variances are too great and reiterate their request and ask that:

The three week comment period on the variance policy be extended an additional 45 days;

The public be given a chance to comment in person at a publicly held hearing; and

The variance applications from pollution dischargers like Inland Empire Paper Company and the other big 4 dischargers be made available to citizens.
