

Paul Lindholdt

The Spokane River is my home. Extend period for comments regarding water-quality variances.

1. A three week comment period is NOT long enough to understand this variance process and its risks to my river – add 45 days to the comment period.
2. Give us, the public, a chance to comment in person at a publicly held hearing.
3. Please make the variance applications from pollution dischargers like Inland Empire Paper Company and the other big 4 dischargers available so that I can read and understand them.
