

Amanda Braley

Dear Ms. Braley

I have several concerns regarding the proposed variances for the Spokane River. Chiefly, we need more time to examine the proposals.

1. A three week comment period is NOT long enough to understand this variance process and its risks to my river – add 45 days to the comment period.
2. Give us, the public, a chance to comment in person at a publicly held hearing.
3. Please make the variance applications from pollution dischargers like Inland Empire Paper Company and the other big 4 dischargers available so that I can read and understand them.

These five dischargers need to communicate with their community about why we should accept their continued pollution in our river.

Sincerely

Amanda Braley
