Hey Ecology! It's no 1980's...RCO 90-48-260. No more point source Waste Discharge or pollution discharge electric mination permits!

ITS Still Up To Yoz! Please save Puget Sound for our grand children.

You need to move FAST! Move Heaven and Earth and stop all effluent, raw sewage and stormwater run off from reaching Elliott Bay, Duwamish, Green! Lake Union ...U have to do it NOW!

Please take a serious look .

HOW CAN Ecology AWARD the dangerous system that has repeatedly failed to protect Puget Sound and All the people who live here!

Last month 4 million gallons of raw sewage entered Puget Sound

Hottest temperatures of the earth recorded

With deadly Consequences to our fragile marine ecosystem...

And now we mourn the death of three more Orcas....feeling so sad and have give up. Biologist warns it's 'past the time' to act for Southern resident killer whales – KING TV

There's no hope....the damage just keeps on!!!

So I ask you, read through the media clips and do something about it!!! The blog, awards, emails are all bullshit when the world is at risk!!!

Take a Closer Look at Puget Sound Pollution

Every year millions of gallons of raw sewage and untreated runoff pour into Puget Sound. Each sewage spill is the result of equipment failure or malfunction at a wastewater treatment plant causing high volumes of raw untreated sewage to enter Puget Sound. In addition, Unexpected and untreated, stormwater runoff pushes petroleum, oil and heavy metals pollutants into Puget Sound.

Sewage Overflow 10 Times Higher Than Previous Estimates

SEATTLE (AP) — THE Washington Department of Ecology says the amount of sewage overflow that forced a Seattle beach to close is 10 times more than original estimates.

KCPQ-TV reports officials said earlier this week that 16,000 gallons had spilled into Puget Sound at Golden Gardens Park. Officials said Friday that additional samples now show about 165,000 gallons of sewage overflow.

130,000 gallons of sewage spill into Puget Sound after power outage

A sign on the banks of Seattle's Lake Union warning that sewage spills into the lake during heavy rainfall. (Dyer Oxley, MyNorthwest)

A windstorm that struck Shoreline caused massive quantities of wastewater to overflow into Puget Sound on Friday, Dec. 14.

RELATED: Seattle sewage plant having trouble keeping up with population

The windstorm caused a power outage at King County's Richmond Beach Pump Station. That caused 130,000 gallons of sewage to overflow into Puget Sound.

Power was out at the pump station for approximately two hours. There were no ill effects in water quality found following the overflow.
