

Sierra Club

Attached are the signatures and comments of 1,072 individuals across the state who, through the Sierra Club, signed onto the following statement:

I am deeply concerned about the renewal of the National Pollutant Discharge Elimination System water quality permit for the US Oil refinery on the Tacoma Tidelands and the limited protections it provides to Tacoma from ongoing water pollution, as well as future impacts from any proposed facility expansion. US Oil currently accepts tar sands oil, a heavy oil that can sink and submerge when spilled and becomes nearly impossible to fully recover. With their purchase of US Oil in 2018, Par Pacific has made it clear that they plan to expand the facility, increasing shipping of crude oil by both rail and tanker. Any expansion of this facility would further expose Washington communities and the Salish Sea to a much greater risk of oil pollution. The draft permit does not go far enough to ensure strong enforcement of toxic discharges from the facility, nor does it address possible changes in impacts that would arise from a facility expansion. Ecology is being too lenient by allowing US Oil to discharge contaminated stormwater without ensuring it has met water quality standards first. Additionally, US Oil is contaminating our waters with copper and zinc, toxins known to kill salmon, a shared resource that is already facing dwindling population numbers. Ecology should implement numerical standards for these pollutants now, not after the permit has been issued. The permit also does not evaluate the additional water pollution impacts of possible expanded operations at US Oil, which could occur during the 5-year period of this permit. I urge the Department of Ecology not to renew the US Oil's NPDES water quality permit until you have done everything you can to assure the protection of our water and communities from these extremely dirty fuels. Further, I urge Department of Ecology to make clear its role and intentions to comprehensively review additional water and air quality impacts resulting from any proposal to expand US Oil refining, storage, or trans loading capacity. When US Oil begins expanding their facility, Ecology must re-evaluate their water quality impacts and re-issue this permit with more protective standards and restrictions. Thank you for your work to protect Washington's communities and clean water.

295 of these signers, you might also notice, added their own additional personal comments. If there are any questions about this statement or our positions on this matter do not hesitate to contact us.

Note: An earlier version of this alert confused a 401 Water Quality Certification Permit with a National Pollutant Discharge Elimination System (NPDES) water quality permit. The team responsible for sending these alerts out regrets the error and will work to make sure it doesn't happen again.

Sincerely,
Victoria Leistman
Dirty Fuels Organizer, Victoria.leistman@sierraclub.org

Nick	Barcott	nbarcott@msn.com	1318 N Lake Stickney Dr	Lynnwood	WA	98087	8/8/2019	

									In an era of disturbing climate change when we should be doing all we can to get off of fossil fuels and transition to green, renewable fuels, allowing this expansion is criminal. Using tar sands oil is a threat to the health of our waters and sea life. It is time to just say NO to this kind of expansion. NO MORE FOSSIL FUELS! The science is clear; we have limited time to turn things around. Do what is right and deny this permit.

Susan	Wood	starsuewood@gmail.com	15808 62nd Pl NE	Kenmore	WA	98028	8/8/2019	An increase in crude oil, would DESTROY the Puget Sound. I have worked trying to get oil off animals and sea life. It is nearly impossible to do and you MUST want to destroy the wildlife and animals of the state. You are doing a great job, and there will be 0 or limited recovery if you increase the dirty tar sands oil in Tacoma and elsewhere. How do you sleep at night knowing you have destroyed the animals, sealife, environment and people's jobs? The area would take hundreds of years to return to the present if you increase the rail lines. PLEASE STOP this immediately!!

									As a life-long resident in the PNW, our endangered wild salmon are a key cultural heritage for me. As an environmental scientist, it is critical that the NPDES permit be based on more stringent water quality standards than those used in the current permit in order to save salmon and protect people, especially the indigenous and other people that make high use of fish caught in the Sound.

									New fossil fuel facilities should be given the greatest scrutiny since they will need to be closed well before their ordinary useful life, as they must be replaced as soon as possible by clean energy infrastructure and hyper efficient goods movement, production and temperature conditioning services. Before being issued permits, the applicant should be required to show that they have a contingency plan for early retirement that includes stringent closure and site cleanup measures. A bond should be required to cover the costs of early retirement.

								I commend the Sierra Club for investigating all the aspects of the US oil permit for the Tacoma facility. I hope the department of Ecology takes these finding seriously and make the needed changes.The permit certainly should not be left open ended where the corporation could do harm and not be held liable.The permit should more fully protect our communities and Salish Sea. Personally I would not permit the facility. I would not accept Tar Sands. If damage is done no one can adequately fix it and it becomes another superfund site. Having such a facility is just wrong for our environment.

Greg	Wingard	gwingard@earthlink.net	24253 180th Ave SE	Kent	WA	98042	8/8/2019	Given how Commencement Bay has been hammered by pollutants from industries in the Tide Flats of Tacoma, Ecology needs to take extra care in re-issuing NPDES permits in this area. In particular the products handled by US Oil are particularly harmful to fish, including salmonids heading up, or coming out of the Puyallup River. National Pollution Discharge Elimination System permits are supposed to ratchet down on pollution over time, coinciding with the five-year renewal process. I don't see evidence that Ecology has done enough to continue to reduce the pollution to water from this facility.

Janet	Hedgepath	gr8tefully@gmail.com	505 NW 45th St	Vancouver	WA	98660	8/8/2019	It is critical that we put our resources to creating a clean energy future and planning for the consequences of climate change rather than continuing down a path that wreaks further harm.

									I volunteer as an environmental site steward for a salt marsh located next door to where U.S. Oil receives barges of diluted tar sands crude oil from the Canadian Trans Mountain pipeline. The Port of Tacoma has suffered decades of toxic pollution and we see first-hand the impacts on the water, air, soil, and wildlife. The risk of an oil spill from unescorted articulated tug barges poses a massive risk to all life in the Salish Sea, especially to salmon and the critically endangered Southern Resident Orcas. If the Canadian Trans Mountain pipeline is allowed to expand as projected, we'll be facing ever more dirty oil transported by barge and tanker all along the Salish Sea. I urge Department of Ecology not to renew US Oil's NPDES water quality permit until you have done everything possible to assure the protection of our water and communities from these extremely dirty fossil fuels. Stand up for future generations. Thank you.

Michele	Murburg Md	mmurburg@comcast.net	4260 Shoreclub Dr	Mercer Island	WA	98040	8/8/2019	The health of our coastline and waterways is crucial to the entire WA ecosystem. No individual or corporate entity has the right to pollute these waters, or even to risk doing so, for any reason. The stakes are far too high. If we kill our oceans, life in this planet will become unsustainable. With solar and wind power, and electric vehicles of all sorts on the rise, it is in any case short sighted and foolish to allow any person or entity to plunder our waterways for dirty energy sources no longer needed by or on the planet. These types of facilities should be scaling down in preparation for closure, not expanding! Gov. Jay Inslee is campaigning as the pre-eminent environmentalist amongst Democratic Presidential candidates. He must show his unwavering commitment to clean water here in WA first!
Noel	Orr	tepeefortwo@comcast.net	1610 NE 192nd St	Shoreline	WA	98155	8/8/2019	I cannot stress enough how important clean water is!! We have a finite amount and, humans keep lowering the standards and accidentally polluting more and more of it to the point that we cannot afford to let ANY pollutants in! Please do not renew the US Oil's NPDES water quality permit. These tideflats are too important to destroy and the area is already under extreme threat. The facility wants to expand to accept more tar sands and none of this should have been approved in the first place!!

Barbara	Williams	bebaanddj@gmail.com	1112 134th Street Ct S	Tacoma	WA	98444	8/8/2019	Fossil fuels are contaminating our air, land and waterways in spite of the best intentions of fossil fuel corporations. My asthma is difficult enough to manage without further threats of contamination! Please don't allow this to continue to happen.
Steve	Green	malogatos@yahoo.com	12719 Country Club Pl	Burlington	WA	98233	8/8/2019	
Lindsay	Lightner	lindsay@lightnerpike.com	1014 Marshall Ave	Richland	WA	99354	8/8/2019	Driving through rural Benton County to our home, I heard my girls ask, ?What?s in that train next to us?? It was a long train, filled with what appeared to be coal. I thought of the schools that it runs past, the canal and rivers it runs past, and of the fires and devastation wrought in the Columbia River Gorge a couple of years back when a coal train caught fire and polluted the Columbia River. We can do better for our children than to take chances with polluting our waters and environment. I feel this keenly as someone who lives near the Hanford Nuclear Reservation and whose community deals with its cleanup daily. There are better sources of energy out there than high-pollution fossil fuels and it is not worth the risk to our kids and environment to allow this permit so that someone else can profit off of Washingtonians? health. Thank you for your consideration.

S	Jacky	stardancer323@msn.com	2411 Lexington St	Steilacoom	WA	98388	8/8/2019		We must protect our community. Oppose dirty tar sands oil in Tacoma. Protect our water and air quality. I urge the Department of Ecology to not renew the US Oil's NPDES water quality permit. If you do renew it, before re-issuing the permit, clarify the Department's comprehensive review of additional water and air quality impacts before US Oil expands their refining, storage, or transloading capacity facility. Ecology must re-issue this permit with more protective standards and restrictions. Implement numerical standards for these pollutants now, not after the permit has been issued.
Susan	Witter	susan.z.witter@gmail.com	2406 Williams St	Bellingham	WA	98225	8/8/2019		Please let?s leave the tar sands in the ground. Keep our communities safe. Thank you.

Sue	Herbrand	raffi153@aol.com	902 N Cushman Ave	Tacoma	WA	98403	8/8/2019	

								Washington is currently spending billions just replacing culverts to try to save salmon populations. It seems dangerously counterproductive to allow US Oil to contaminate water with toxins know to harm salmon. Instead the State should ensure US Oil puts every possible safeguard in place to prevent pollution and should ensure it has met water quality standards when discharging water.

Desiree	Douglass	dld@douglassconsulting.net	12018 12th Ave NW	Seattle	WA	98177	8/8/2019	As an environmental planner and parent, the laxness with with WDOE issues WQC permits and NPDES permits for the most toxic polluting fossil fuel projects is an insult to our State environmental laws and our Water. You are charged with protecting our State Waters and you are known as a extraordinarily demanding agency when much lower-impact projects apply for these same permits. But for fossil fuel projects, you seem to take the approach that the Puyallup Estuary is already destroyed so you rubber stamp every expansion and new dangerous projects such as PSE's LNG. Please knock it off. Use your demanding standards hardest on these projects. Take initiative to bring the Puyallup Estuary back. if you start protecting the most vulnerable, the most damaged of our Waters, you will earn our respect and support. Thank you!

									We don't need anymore oil risks in the Salish Sea. Already, salmon and orcas populations are crashing and further pollution might be all it takes to drive them into extinction. Oil, especially tar sands oil, is difficult to remediate once a spill occurs and spills always occur sooner or later. That is a risk we do not need in Washington state, where our waterways, fisheries and the Salish Sea are all already under enormous pressure. Do what is right for Washington state not the dirty fossil fuel industry.

								Oil train accidents have already spilled oil into rivers, and caused oil tanker fires. Tar sands spills in rivers have permanently damaged them, due to the insurmountable difficulty in cleaning up tar sands spilled into water. These kinds of incidents are inevitable due to human error and accidents. In Washington State, our quality of life depends on a healthy environment, including clean air and clean water. Our local economy also benefits from that healthy environment. The toxic releases from this plant must be meaningfully regulated to protect air and water quality, salmon and other aquatic species, and other wildlife. The potential permanent harm from any releases of copper and zinc are real, and deadly. The Department of Ecology must do its job to fully review the NPDES permit and grant it only if there will be adequate protection of our air, water, wildlife and other aspects of our ecosystems.
Bob and Ellen	Sieh	bobsieh@earthlink.net	1001 31st Ave E	Seattle	WA	98112	8/9/2019	
Maureen	Hildreth	mcoshildreth@outlook.com	5717 NE Hazel Dell Ave Apt A	Vancouver	WA	98663	8/9/2019	The message is clear: our planet simply cannot sustain the continued onslaught of pollution from fossil fuels, the related damage to the surrounding environment, plus the possibility of a disastrous conflagration. Take the high road for the 21st century. We must do better!

Edith	Gish	ewgish@gmail.com	6043 S Oakes St	Tacoma	WA	98409	8/9/2019	Given that Tacoma lies near The Cascadia Subduction Zone, I think it would be lunacy to allow shipment of tar sands oil from this facility, even the storage of this material is hazardous considering the area. Please do not endanger this fragile ecosystem.

Jeff	Laik	jefflaik@yahoo.com	29223 208th Ct SE	Kent	WA	98042	8/9/2019	The Salish Sea is already under tremendous pressure from the loss of natural shoreline and habitat, surface runoff of pollutants, sewage spills, plastics pollution and other discharges from marine traffic. The decline of the southern resident orca population is one clear indication that the health of our inland sea and the marine life it supports is in great danger. Adding the additional shipping traffic and the inevitable spills that will result from this terminal will only further damage these waters. Permitting this facility deep inside Puget Sound is an invitation to disaster.

Mary	Kennedy	glmlkennedy5@gmail.com	2103 35th Ave	Longview	WA	98632	8/9/2019	I don't want the Par Pacific to expand so that they will be traveling crude oil by train through Washington State. We have had train derailments before in our State and we don't need anymore. It is a mess to clean up and it gets into the river and the animals, fish and our water is involved so we don't need dirty tar sands oil.
