

Katie Shapin

Thank you for your work in updating the Children's Safe Products Act with a mandatory listing of 'chemicals of concern'. I am pleased to see that several toxic flame retardants are included. Please consider keeping D4 on the list; it is an endocrine disruptor that has been linked to developmental problems, and adding DIIP, DEMP, DIOP - all hormone-disrupting phthalates, as well as stain resistant & non-stick chemicals like PFOA.

Respectfully, Katie
