

# Emily Gunn

Dear Kara Steward,

Thanks for updating "Children's Safe Products Act" with "chemicals of concern" mandatory listing.

Thanks for including several toxic flame retardants. However, I request you add:

- Hormone-disrupting phthalates DIPP, DEMO, DIOP
- Stain-resistant and non-stick chemicals PFOA and related chemicals that break down from PFOA
- Please keep the chemical D4 on the list as is it an endocrine disruptor linked to developmental problems.
