Comments:

Bottom Line: I want to see Occidental do the very most thorough cleanup possible. NO SHORT CUTS! No leaving chemicals "in place"

They made the pollution and THEY need to be responsible and remove this poison from all these lands, tribal land and →

from public waterways.

I want to see Hylebos
creek come back to life. We
must help in this endeavor
by REMOVING ALL the pollution.

Please, ECOLOGY,
stand tall + might +
demand a full cleanup AND
capping for future generations
