

Dan Rosner

My Name is Dan Rosner and I live in the north end of Tacoma several miles from the Occidental contamination site.

I am deeply concerned about the future of Puget Sound in general and the toxic contamination from the Occidental Chemical Corporation site in particular.

I have read in the News Tribune that in order to cut costs, Occidental Chemical Corporation has proposed cleaning up

less than half of the estimated highly toxic pollution underneath Commencement Bay, a vulnerable aquatic ecosystem.

I believe that allowing Occidental Chemical Corporation to cut corners to save money regarding the cleanup would create

a dangerous and unacceptable precedent for our community and the state of Washington. I urge the Department of Ecology to require

that Occidental remove the maximum amount of their dangerous toxins possible from the environment, and not be allowed to dump any of

their mess onto the commons that our children and future generations will inherit from us.

Sincerely,

Dan Rosner
Tacoma
