

## Darlin' Boudreau

As a native and lifelong Washingtonian, I implore you to stand up and protect us by requiring the Occidental Chemical Co. to conduct a complete and comprehensive cleanup of their site on the Tacoma tide flats. This is a super fund site and the most polluted site in Commencement Bay. There is no reason why they should reap the profits, after polluting our land and water, and not be responsible for cleaning up their destruction of people's property, i.e. our land and water. Why/how they consider any less than 100% cleanup is acceptable is unfathomable. Further, this cleanup should be accomplished as quickly as possible.

Regards,

Darlin' Boudreau
