

Tacoma-Pierce County Health Department

Hi Kerry,

I'm just starting to do some review of feasibility study and was wondering if there had ever been any follow-up to our initial question about potential impact to drinking water wells located along Marine View Drive. Back in October 2015, I had asked for finding/sampling wells to be included in the investigation/assessment efforts. I don't see where any of that happened, but wanted to confirm and what the rationale had been.
