

# Robin Yeager

To Kerry Graber-

What's up with the Occidental Chemical site cleanup? It is hideous that a company profits from a piece of land and essentially abandons that land once it is poisoned beyond all recognition!! Occidental needs to have its feet held to the fire and cleanup the mess they were abundantly aware of. Our World Population is too large now to provide basic food and water to. We cannot continue to leave an oozing open sore on the land that now pollutes an enormous amount of water.

Let's get to cleanin'!
