① Will there be occasional / 3rd party audits of monitoring results throughout the entire process? I hope so.

② How often will progress reports be issued & available to the public?

③ With the understanding that pollution limits have changed over time, can it be identified if any

over

any of the discharges occurred when that discharge was/would be considered "illegal" and, if so, was anyone prosecuted and/or fined for the "illegal" activity?

④ I believe that the Occidental Chemical site

should be cleaned up as completely as technically possible, and as closely to 100% clean, regardless of cost.
