

Linda Fortune

Simply put Bridgette, here is my input. Our environment is of the utmost importance for our health and enhancement of life. Restoration of damaged nature should be thorough and complete. The sins and ignorance of the Hooker Company in how they treated the land is beyond comprehension. Occidental Chemical took over Hooker and that brought the obligation to correct Hooker's damage. Keep them obligated to undue the damage and completely restore the land and water to its original state.

Thank you,
Dr. Linda Fortune
