

**Roxanne Murray -**

My name is Roxanne Murray, I'm a Tacoma photographer and activist. I am all for cleaning up a contaminated site and have the perpetrators pay 100% of the cleanup of the entire site, not just one small portion. I want the whole area cleaned, but I would like to know the point is of having a hearing on the Occidental Cleanup Site if the fracked gas facility is going to be next to the site and we have maps that prove that. Are we trying to clean up the site to get it ready for Puget Sound Energy Fossil Fuel Project? Part of the site is being leased to Puget Sound Energy. Is there any plan for development on the site? How will the LNG affect the plume, this was not addressed at all.
