

Todd Hay

Hi Kerry-

I attended the public forum session that you held regarding the Occidental Chemical Plume Cleanup in the Tacoma Tidelands. I am interested in getting access to a number of the data that were presented at the meeting, in particular:

ESRI Shapefile or File Geodatabase layers of the following:

- facility layout
- modeled plume extent intensities

Basically the layers shown in the graphic here:

<https://fortress.wa.gov/ecy/gsp/SitePageImageHandler.ashx?id=1695>

Also, I would like to get access to the well sampling sites information (location, depth, dates/times of sampling, sampling results). This was shown as a 3D graphic on another slide during your presentation but I'm not readily seeing it on the Dept of Ecology website here:

<https://fortress.wa.gov/ecy/gsp/Sitepage.aspx?csid=4326>

Thanks for your assistance with this Kerry, and for leading up this very important issue.

Oh, one final comment. I did receive a card in the mail from you regarding the due date for public comment, but it was slightly misaddressed (to 4301 N Mullen St), but my correct address is below. If you would, please update this.

Sincerely,

Todd Hay
