## Comments:

I want the best/most stringent clean-up

Don't offer me no short cuts,  
less than 50% →

I ~~do~~ want renewable energy

- Health

I want my people to feel safe &

- education (I know)

their families to live peacefully

- Welfare

w/o worrying for their local health

→ implementing  
monitoring needs to  
have more teeth

or biological development based on  
a crappy clean-up plan.
