WA State Department
of Ecology (S.W.T.C.)

Name:

Dale Boon

Representing:

Individual and Port of Woodland

Date:

Sept 29, 2017

Comments:

As a fellow Port Commissioner, I wholeheartedly support the proposal presented as an "Alternative" by the Port of Longview for several reasons:

1. By removing the material from the site, it cleans up Port of Longview area, as a "clean site," not as a potential questionable area, even though it wouldn't be after its been treated etc. The old policy "Out of sight, out of the Public's eye," even though it would be

monitored at its final disposal site.

2. The site will be totally usable, instead of having an area "Red taped," as unusable forever.

3. The Port of Langview has agreed to all associated costs, for both removal and monitoring over and above what I.P. is responsible for.

I am not submitting this just as a "Port supporting a Port" but as a common sense approach to an age old problem of "Just the Right Thing to Do"

Please include me in your follow up discussions at.
