

City of Redmond

New section WAC 173-323-100 Reimbursement only allows reimbursement for eligible costs incurred on or after the signature date of the agreement (effective date). Ecology should consider changing this section to allow costs to be retroactively reimbursed back to the start of the State's fiscal year (July 1) instead of the effective date of the agreement. This will allow cities to be reimbursed for eligible costs they have incurred during the period in which the budget had not been passed.
