

## Clallam County

I have a comment on section -020 (2)(bb), "Management of routine non-livestock animal mortalities by burial, incineration in a unit with a design capacity of less than twelve tons per day, natural decomposition, or rendering, when managed in compliance with WAC 246-203-121, General sanitation."

The phrase, "incineration in a unit with a design capacity of less than twelve tons per day" needs to be clarified to ensure the unit meets some engineered standard and that it meets air quality standards.
